25 Years**

Established 2000

**Design And Manufacture
Of Custom Built
Air Handling Equipment**

CLP AIR GROUP

CLP Air Group are a company specialising in the air movement / HVAC industry.

Established in 2000, our owner managed group has three divisions consisting of:

- » CLP Air Handling
- » CLP Site Air Services
- » CLP Filters

Throughout this time CLP have provided excellent customer service and received complimentary customer testimonials and recommendations from various industry sectors.

Our team are always happy to discuss any of your requirements and would welcome the opportunity to explain further how we can assist you with your future projects.

Air handling units (AHU's) provide conditioned and controlled air movement throughout a building. A typical CLP Air Handling unit will clean the incoming outdoor air and temperature conditions and provide a measured volume of airflow into the building distributed via a ductwork system. All equipment is designed to fit through the specific available access, delivered to site, positioned and fully assembled by our own engineers. Our specialist flat pack installation team have fitted units into the tightest near impossible locations.

Our team can refurbish various types of Air Handling Units for different applications. These include changing belt driven centrifugal fans to high efficiency plug fans (AC and EC versions). By removing old inefficient belt driven fans and replacing with the latest direct driven EC or AC fan technology, large energy savings can be achieved. We can advise on the cost saving benefits of carrying out such a change. We can also advise on the range of speed control options available to ensure the highest possible energy efficiency system.

CLP Filters are part of the CLP Air Group. We provide a full range of HVAC filters to many different industries and offer an excellent professional hands on friendly customer service. With over 50 years of combined industry experience within the hands on management team, we are perfectly suited to provide an all-encompassing filter supply and management service. Our experience enables us to provide excellent technical support and to cater for all industries. All of our products are manufactured to stringent quality standards and conform to all the latest regulations.

AIR HANDLING

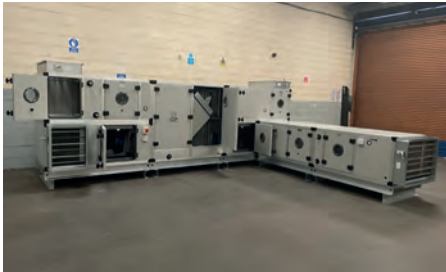

- » Fully custom built equipment
- » Energy efficient designs
- » Specialists in flat pack installations
- » Unrivalled fast track delivery
- » High efficiency heat recovery AHU's
- » The latest fan technology
- » Fully pre-wired energy efficient controls

SITE AIR SERVICES

FANS

- » High efficiency fan upgrades
- » Fan maintenance

AIR HANDLING UNITS

- » AHU maintenance
- » Flat pack AHU installations
- » Comprehensive site surveys
- » Full AHU condition reports
- » AHU refurbishment
- » Controls

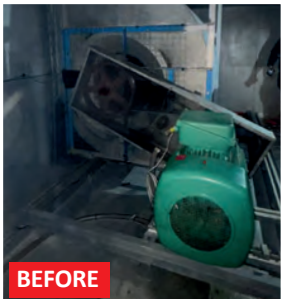

COIL REPLACEMENT

FAN REFURBISHMENT
